

Cisco Threat Response

Security that works together

Cisco Threat Response is an exciting innovation and key pillar of our integrated security architecture. It automates integrations across Cisco Security products and threat intelligence sources, accelerating critical security operations functions:

Detection: Find and confirm the most important threats faster.

Investigation: Easily determine where you're affected and how.

Remediation: Respond immediately from within Threat Response.

Cisco Security investments deliver more value when products work together to save time and manual effort -- especially during cyberattacks when time matters most.

Benefits

Cisco Threat Response unleashes the full power of the Cisco **Integrated Security Architecture**.

•**Out of Box integrations.**

Get more from your Cisco Security investments when they are already working together.

•**Designed for your SOC.** Reduce the burden on your other security products and make them work better.

•**Save time and effort.** Speed cyber investigations significantly and take corrective action immediately.

•**No additional cost.** Get it today with integrated Cisco Security product licenses. There's nothing else to buy.

Aggregated Threat Intelligence

Cisco Threat Response integrates threat intelligence from Cisco Talos and third-party sources to automatically research Indicators of Compromise (IOCs) and confirm threats quickly.

Incident Tracking

Cisco Threat Response provides the capability you need to collect and store key investigation information, and to manage and document your progress and findings.

Automated Enrichment

Cisco Threat Response adds context from integrated Cisco Security products automatically so that you know instantly which of your systems were targeted and how.

Seamless Drill-Down

Cisco Threat Response makes it easy to continue deeper investigations into integrated Cisco Security products. For example, with one click, you're inside Cisco AMP for Endpoints with detailed information on how suspicious files traveled through your network.

Intuitive, Interactive Visualizations

Cisco Threat Response shows your results on intuitive, configurable graphs and timelines for better situational awareness and quick conclusions.

Direct Remediation

Cisco Threat Response lets you to take corrective action directly from its interface. Block suspicious files, domains, and more — without having to login to another product first.
